

# Introduction to Khan Academy and Official SAT® Practice on KhanAcademy.org

In 2014, Khan Academy and the College Board announced a landmark partnership to provide free, world-class test practice for all students. Beginning in early June 2015, all students will have the opportunity to practice for the redesigned SAT® using Khan Academy's online tools, including diagnostic quizzes, full-length practice tests, interactive problems, and personalized practice recommendations. Students will also receive instant feedback on their answers so they can see their progress and make the most of their study time.

Official SAT Practice will continue to be enhanced after its launch. For example, scaled scoring for practice tests will be available by fall 2015, allowing students to track their growth and see how they might perform on the real test. Eventually, students will even be able to upload their PSAT/NMSQT® scores to Khan Academy to get an even more personalized SAT practice experience.

**Khan Academy** is a nonprofit that provides free online materials and resources to support personalized education for learners of all ages. The 501(c)(3) organization was founded by Salman Khan in 2008 and now has a team of around 60 full-time **staff**.

Khan Academy serves to inspire, instruct, and guide users' learning. Their learning resources include practice exercises, instructional videos, dashboard analytics, and teacher tools designed to empower learners inside and outside of the classroom to study at their own pace. The learning experience adapts to each individual, helps them to see their progress and goals, creates personalized recommendations about what to learn next, and motivates them to master the skills they seek.

Khan Academy reaches all corners of the globe. While 60 percent of their students are from the United States, the rest hail from countries like India, Brazil, Mexico, South Africa, and beyond. They have video lessons translated into almost 40 languages and counting, and have full **Spanish**, **French**, and **Brazilian Portuguese** versions of the site.

To date, Khan Academy has delivered over 400 million lessons and learners have completed over 3 billion exercise problems (around 4 million per day!). In addition, 900,000 registered teachers around the world use Khan Academy in their classrooms to help inspire, motivate, and guide students along their learning paths. In fact, many students getting ready for the SAT are already using Khan Academy in school or for homework help.

Khan Academy covers subjects from **basic math** to **physics**, **biology**, **economics**, **art history**, **computer science**, **health and medicine**, and more. They have also partnered with institutions like **NASA**, **The Museum of Modern Art**, **The California Academy of Sciences**, and **MIT** to offer specialized content.
