

Why Use Free Practice on Khan Academy?

Khan Academy and the College Board have released new data linking Official SAT Practice on Khan Academy to substantial score gains from the PSAT/NMSQT to the redesigned SAT.

An extensive study, which includes nearly 250,000 students from the graduating class of 2017 who took the new PSAT/NMSQT and the new SAT in the past year, connects time spent practicing on Khan Academy with score improvement on the SAT. Practice advanced students regardless of gender, race, income, and high school GPA.

Check out these impressive highlights:

Studying for the SAT for 20 hours on free Official SAT Practice on Khan Academy is associated with **an average score gain of 115 points**, nearly double the average score gain compared to students who don't use Khan Academy.

When students practiced for shorter periods of time, there were still meaningful score gains. For example, **6-8 hours of practice was associated with an average 90-point increase** from the PSAT/NMSQT to the SAT.

Many students are seeing extraordinary results. Out of nearly 250,000 test takers studied, **more than 16,000 gained 200 points or more** between the PSAT/NMSQT and SAT.

16,000
students saw
gains of
200 points
or more.

Need more proof? Want more resources? We've got it!

- The Official SAT Practice Flyer
- An infographic highlighting student score gains to share on websites, newsletters, social media, or in classrooms
- A one-pager featuring stories from students who benefited from Official SAT Practice
- A video created by the College Board called "Better Takes Practice."
- *New York Times* article "Owning Your Own Future" about PSAT/SAT practice.
- Northview High School's student video on the impact of Khan Academy practice.
